

## ARCHITECTURE AND DESIGN

Titan Waterjet's 6' X 20' abrasive waterjet can create a vast array of architectural and design components as well as finished products. In addition to our waterjet services, we also offer a full arsenal of design and fabrication services. We can create showroom prototypes, full production runs and everything in between.

## MATERIALS

Architectural materials are fairly limitless. Metals, woods, plastics, stone, ceramics, glass, laminates, fabrics, leather, vinyl, foams and much more.
