

SHEET METAL CUTTING AND FORMING

Titan Waterjet's 6' X 20' abrasive waterjet and 12' 176 ton CNC pressbrake can create a diverse array of components and finished products for industry and beyond. Our design and engineering department can easily prepare 3D CAD files for complex control panels and boxes as well as many other components.

MATERIALS

3003, 5052 and similar aluminum, stainless steel, A36 steel, copper, brass, other soft metals, polycarbonate and more.
